

Again we find out that congress wants to tell us what we need. When will this stop. Over 1 million subscribers should tell you what we want. We are paying for services that we like and want. You should be telling fm radio to change some of the ways it should better itself instead of having congress do it for them! You should be worrying about what is going on in the world instead of whats going on in the radio world. Leave my xm radio alone. I want it I pay for it so don't tell me what I want.
